EDUCATION	The Hong Kong University of Science and Technology <i>Sept 2023-Aug 2026 (Expected)</i> <i>Ph.D. Candidate in Operations Management, HKUST Business School</i> <i>Hong Kong</i> The Hong Kong University of Science and Technology <i>Aug 2021-Aug 2023</i> <i>M.Phil. in Operations Management, HKUST Business School</i> <i>Hong Kong</i> High pass in 2/2 subjects in the Ph.D. Qualifying Exam Master's Thesis: Quality and Welfare Implications of Product Traceability in Supply Chain Renmin University of China (985, 211) <i>Sept 2017-Jun 2021</i> <i>B.Sc. in Physics, School of Science</i> <i>Beijing</i> GPA: 3.56/4.00 (87.3/100) Science Experimental Program (an elite program for students with national competition awards in <i>mathematics, physics, and computer science</i>) Undergraduate Thesis: From Topological Bands of Fermions to Quantum Magnetism: Variational Monte Carlo Phase Diagram of the $S = 1$ Spin Chain	
JOURNAL PUBLICATION	1. "Navigating Traceability: How Pricing and Responsibility Sharing Impact Quality and Welfare", with Lijian Lu and Ruxian Wang (Forthcoming in <i>Production and Operations Management</i> (UTD 24, FT 50, ABDC A*), https://doi.org/10.1177/10591478261443754) <i>Abstract:</i> Developed a multi-agent game-theoretic model showing that under multinomial logit (MNL) market share allocation, the impact of traceability on product quality and supply chain welfare depends on pricing power and responsibility allocation. Identified the conditions under which traceability improves quality and benefits buyers or suppliers. <i>Conference Presentations:</i> – Honorable Mention in the Best Student Paper Competition, POMS-HK, 2023 – POMS-China, 2022 – INFORMS Annual Meeting, 2021	
WORKING PAPER	1. "Oligopolistic Competition in Online Marketplaces: The Roles of Business Models", with Guillermo Gallego and Lijian Lu (https://ssrn.com/abstract=4422808) <i>Abstract:</i> Developed a supply function competition framework to analyze selling formats in a two-sided marketplace. Showed that a contribution-based model is the unique equilibrium and the only format that achieves the first-best coordinated outcome. Proposed a variant that provides a stable, economical, coordinated, and individually aligned outcome for all firms. <i>Conference Presentations:</i> – POMS-HK, 2025 – CSAMSE, Xiamen, 2024 – CSAMSE, Shenzhen, 2023 – MSOM Conference, Montreal, 2023 – POMS-HK, 2023	
WORK IN PROGRESS	1. "Tax Relief or Public Belief: CSR-Induced Consumer Segmentation with Tax Incentives", with Lijian Lu and Ruxian Wang (Manuscript in Preparation) <i>Abstract:</i> Developed a product-line model to analyze the interaction of CSR, quality differentiation, and tax policy under heterogeneous consumer expertise. Identified conditions under which firms strategically increase CSR, raise prices, shift toward premium-focused strategies, and improve profits. Showed that CSR tax deductions can benefit firms, consumers, and governments, depending on decision power. <i>Conference Presentations:</i> – INFORMS Annual Meeting, Atlanta, 2025 – MSOM Conference, London, 2025 (poster) – POMS-HK, 2025 – INFORMS Annual Meeting, Seattle, 2024 – CSAMSE, Xiamen, 2024 2. "Improving Product Quality in Presence of Spillover Effects: Adopting Traceability or Inspection", with Lijian Lu and Ruxian Wang (Manuscript in Preparation) <i>Abstract:</i> Developed a Stackelberg game-theoretic model to study traceability and quality inspection in a supply chain with competing suppliers and spillover effects. Showed that traceability can either	

	improve or reduce equilibrium quality depending on inspection intensity, spillover, and quality costs. Identified pricing and cost conditions under which traceability yields win-win outcomes for supply chain members.	
	3. “Data-Driven Optimization of Mobile Blood Collection Locations and Blood Supply: Evidence from a Major Blood Center in Shenzhen” (Work in Progress) Data collection completed; data analysis underway.	
	4. “Penalty Allocation under Traceability Adoption”, with Lijian Lu and Ruxian Wang (Work in Progress) Main analysis completed; 44-page draft prepared.	
TEACHING EXPERIENCES	1. Instructor – ISOM 2700 Operations Management, 3 credits UG Course, Class size: 37 Teaching evaluation: 4.0/5.0 2. Teaching Assistant – ISOM 5800 Business Modeling, 1 credit Instructor: Prof. Hongtao Zhang MBA Course, Class size: 48, 49, 52, & 20	25 Summer 22 Spring, 22 Fall, 23 Spring & 23 Fall
PROFESSIONAL EXPERIENCES	1. Ad Hoc Reviewer: – <i>Manufacturing & Service Operations Management</i> (UTD 24, FT 50) 2. Judge for the 2026 CSAMSE Best Paper Competition 3. Internships: – Research Assistant, Financial Engineering Group, China Securities Co., Ltd. Modeler & research report author – Quantitative Research Intern, Makers Venture Capital	 Sept 2020-Dec 2020 Jan 2020-Mar 2020
SELECTED AWARDS AND HONORS	Research Postgraduate Top-Up Award HKUST RedBird PhD Scholarship Honorable Mention in the Best Student Paper Competition, POMS-HK HKUST Postgraduate Studentship Outstanding Graduates of Renmin University of China Excellent Graduate Thesis of Renmin University of China ($\leq 5\%$) First Class Scholarship for Study Progress First Prize of National University Student Computer Skills Application Competition (in C++ Group, 5%) Outstanding Community Backbone Second-class Scholarship (0.2%) China High School Physics Olympiad (CPhO), Provincial, Third Prize China High School Mathematical Olympiad (CMO), Provincial, Third Prize China High School Biology Olympiad (CHSBO), Provincial, Second Prize	Sept 2023-Aug 2026 May 2023 Jan 2023 Sept 2021-Aug 2026 Jun 2021 Jun 2021 Dec 2020 Jul 2020 Dec 2019 Oct 2016 Sept 2016 May 2016
COMPUTER SKILLS	MATLAB (proficient), Mathematica (proficient), C++, Python, R, L ^A T _E X, Linux	
ENGLISH PROFICIENCY	GRE 333/340 (Quantitative 170/170, Verbal 163/170, Analytical Writing 4.5/6.0), IELTS 7.0/9.0 (Listening 7.5/9.0, Reading 8.0/9.0, Writing 6.0/9.0, Speaking 6.0/9.0)
